

## Worksheet for Choosing an Affirmative

Do you like to debate topicality?	If not, which cases should you avoid?	If yes, which cases should you consider?
Do your strengths gravitate toward big debates with big impacts (and thus take disadvantages straight on) or would you rather have a smaller, slower debate in which you dodge links.	If you like fast and big, which cases should you consider?	If you like slow and small, which cases should you consider?
Are you able to debate kritiks well?	If yes, which cases should you consider?	If not, which cases should you consider?
Are you able to debate counterplans well?	If yes, which cases should you consider?	If not, which cases should you consider?
Where do you debate and what do you know about the types of affirmatives that will succeed and fail.	Affirmative cases that will succeed.	Affirmative cases that will fail.
